The Cass MSc in Global Supply Chain Management

The Cass advantage

Located in the heart of the City of London, one of the world's great financial centres, Cass Business School is home to one of the largest finance faculties in Europe. Studying for your Masters here means being part of a global network of Cass students, alumni and partners, and ideally positioned to embark on the next exciting stage of your career journey.

About the course

The MSc in Global Supply Chain Management will cover topics such as strategic supply chain management and procurement, supply chain analysis and finance, and the management of operations. Students will develop key business skills including project management, team-working and critical thinking skills needed to operate effectively when making decisions at postgraduate/specialist level. An emphasis on applying theory and developing knowledge through various teaching tools and live cases throughout the course enables students to understand the complexity of managing global supply chains.

Careers

During your time at Cass, you will have access to a dedicated Relationship Manager who will share their knowledge and expertise with you. We also offer company presentations, careers fairs, workshops and online resources to help you devise your own career strategy.

The MSc in Global Supply Chain Management will be launched in September 2014. The aim of this course is to develop graduates with strong strategic supply chain knowledge and advanced analytical and consulting skills. These characteristics are highly valued across industry sectors. We expect our students to engage with a variety of roles in business, for example, procurement management in retail, supply chain consultancy or specialist finance positions in the banking and insurance sectors.

Scholarships

Each year, the School makes funds available for scholarships to outstanding students.

The Cass MSc in Global Supply Chain Management

Curriculum overview

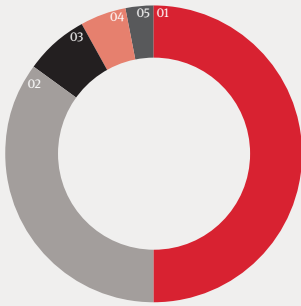

Combining a deep understanding of core theories and concepts in international supply chain and operations management, with an emphasis on analytical and decision making frameworks, this course is designed to create knowledgeable, confident and connected supply chain professionals, whose skill-sets are attractive across industry sectors.
